EAR ONE TOUCH PRO DISPENSER

Conveniently provide hearing protection where employees need it. The 3M One Touch Pro Earplug Dispenser dispenses one earplug at a time with a simple twist. No more expense and waste of individually wrapped plugs. Made from ABS plastic with a powder-coated steel-back plate, it's designed for challenging environments indoors and outdoors.

- Accurately dispenses one earplug at a time
- Dispenses earplug directly into hand
- Durable ABS plastic for tough environments
- Free-standing or wall-mounted
- Shields earplugs from wind and rain
- Mounting holes designed to fit a variety of competitive dispensers
- Dispenser only

PELTOR OPTIME I HEADBAND

- Optime I is very versatile protection, characterised by its lightness. Despite being so lightweight, it is the best imaginable protection.

- We have combined a low profile with generous inside depth. This makes it easy to team with other equipment and means that the ear rests comfortably.

- Optime I is the natural choice when you need to use all-round protection for both short and long spells.

- The wide, comfortable sealing rings are filled with a unique combination of fluid and foam, which gives optimum sealing and low contact pressure, ensuring the best possible comfort even during long periods of use.

- It is first-rate for use in environments with moderate industrial noise, such as workshops, sheet-metal shops and printing works, but can also be used to good effect outdoors, for instance when mowing the lawn or in connection with hobby and leisure activities.

- SNR 27dB, H=32dB, M=25dB, L=15dB

PELTOR OPTIME III HEADBAND

• Optime III is a super-muff, and has been developed for use in extremely noisy environments.

• The protection is based on a technology with a double casing that minimises resonance in the holder casing. This results in maximum high-frequency muffling, while at the same time its still easy to understand speech and signals.

• An acoustic connection between the inner volume and the volume between the casings in its turn provides maximum low-frequency muffling.

• The sealing rings are broad and filled with soft plastic foam for the best fit and low contact pressure.

• Effective protection and best comfort are the hallmarks of Optime III.

• SNR 35db

PELTOR WORKTUNES PRO AM/FM RADIO HEADSET

The 3M PELTOR WorkTunes Pro Headset helps protect you from potentially harmful workplace noise while at the same time enjoy listening to the built in AM/FM radio. The built-in antenna, fast digital tuning and ability to store stations makes the hearing protector flexible and easy to work with.

Benefits

- Protect your hearing and listen to AM/FM radio at the same time with built-in antenna.
- Digital station search and voice guided menu system with announced frequencies
- 3.5 mm listen only stereo input (limited to 82 dB) for connection to external devices (e.g. mobile phone, radio, two-way radio and iPod)
- Auto power off turns headset off after 4 hours of non-use, to save energy and a low-battery warning informs you when to change batteries
- To reduce the corrosion caused by sweat the electronics are located in the outer part of the cup
- Store up to 5 stations on the headset
- 40 hours battery life

SC2 EAR DEFENDER

- Suitable for environments with a medium to high level of noise
- The best choice in high frequency noise situations
- Smooth telescopic size regulation
- Non-conductive
- Conforms to EN352
- Clips straight into the Zenith helmets without an adapter
- Requires KAWAC00003 bayonet adapter for the plasma helmet (sold separately)

SNR rating dependant on helmet combination:

- Plasma, HP, Superplasma - SNR 29
- Zenith - SNR 28

MOLDEX 6810 WAVEBAND 1K

- The WaveBand puts very little pressure on the ear so these bands can be worn for longer periods of time.
- Comfortably worn under the chin.
- The sleek wave design allows the band to float, keeping it away from the wearer's body and clothing, eliminating the problem of noise transmission completely.
- Made from dual material, with soft grip points the WaveBand is extremely lightweight - only 12g
- Low band pressure for a high level of comfort.
- Replacement pods available. Code M6825 and M6830
- SNR 27

V-GARD HELMET MOUNTED EAR DEFENDER LOW

For industrial workers, the V-Gard® Helmet-Mounted Hearing Protection Line delivers enhanced comfort and top-of-the-line performance with upgrades in fit and style—all without compromising the quality expected from the legendary V-Gard brand.

- Passive helmet mounted ear defenders
- Low Attenuation, SNR 28 dB
- Green colour coding for easy identification
- Available in 2 other levels of attenuations, MSA10190357 SNR 32 dB and MSA1090358 SNR 36 dB
- Work with MSA V-Gard slotted Industrial helmets and MSA V-Gard visors & frames
- Matte material for cup and ear pads decreases look of wear and tear
- Includes the next generation "V" design from the Iconic V-Gard
- Foam injected ear pads cushion for soft points of contact
- Custom MSA sealing rings for optimal comfort & SNR performance
- Upgraded fork design for sleek look and modernized feel
- Improved sealing ring and adapters optimize pressure on the ears for all day comfort
- Recessed interior foam doesn't touch user's ear while in use
- Vertical adjustment for custom fit
- Parking position to easily stow the earmuffs when not in use
- Conforms to EN352-3:2002 Hearing protectors. Safety requirements and testing. Ear-muffs attached to an industrial safety helmet Certified by INERIS to EN ISO 80079-36 : 2016 & CEI/TS 60079-32-1 : 2017 for safe use in ATEX areas (ELECTROSTATIC-INERIS Certificate n° 29406)
- Dust: zones 20, 21, 22 (all zones)
- Gas: zones 1 & 2 with gas group IIA (Propane)

UVEX HI-COM CORDED DISPOSABLE EARPLUGS

The innovative shape of the Uvex hi-com earplugs reduces the level of sound that normally builds up in the inner ear when wearing hearing protection. Integrated cavities result in a larger surface area in the direction of the eardrum. The earplugs provide softer acoustics and absorb disruptive noises – they also allow excellent speech perception.

General features

- Earplugs with low sound absorption and excellent speech perception
- Available colours: lime, fawn
- Version with cord

Protection features

- Meets standard EN 352-2 and the additional requirement "Warning signal hearing, general" (W)
- 24 decibels insulation H: 26 dB, M: 20 dB, L: 18 dB

UVEX XACT-FIT CORDED EAR PLUG

- SNR: 26dB
- Suitable for noise exposure levels up to 97dB(A)
- Easy, accurate fitting every time
- Tapered shape fits the natural shape of the ear canal
- Ergonomic steps c/w left and right fitting ensures consistently accurate insertion and optimum protection
- Adjustable neck cord
- Replacement plugs available 2124-002 (250 pairs per box)

PELTOR X1 HEADBAND

The X-Series earmuffs are 3M's latest advancement in hearing conservation. New technologies in comfort, design and protection all come together in this groundbreaking earmuff line. The X1A is a lightweight, low-profile earmuff designed for protection against low-level industrial noise and other loud sounds. It features an electrically insulated wire headband, often referred to as "dielectric".

- The wire headband offers consistent pressure over prolonged wearing periods.
- Earcup pivot points tilt for optimum comfort and efficiency.
- Noise Reduction Rating (NRR) 22 dB. CSA Class A.

NOTE: The X-Series (over-the-head) headband version is electrically insulated - sometimes referred to as "dielectric". The metal components of the headband have been covered by non-conductive material for use in a low voltage electrical hazard (less than 440 V ac). As there are no applicable standards for testing ear muffs against electrical insulating properties, the product has been evaluated at an external laboratory against a modified test method based on EN397:1995. During assessment, the leakage current did not exceed 1.2mA when the external surface of the product made contact with an electrical source. The user must determine the overall suitability of this product for the intended application taking into account any hazards other than noise for which this product is tested.

The NRR may overestimate the hearing protection provided during typical use. 3M recommends reducing the NRR by 50% for estimating the amount of noise reduction provided.

PELTOR X1P3 HELMET ATTACHMENT

The 3M Peltor X1 Ear Defenders are designed to offer protection against light industry noise. For example, grounds maintenance or power drilling.

- Slim-line cups for moderate attenuation that meets the needs of most industrial applications.
- Lightweight design.
- Simple colour coding: green, indicating the first level of attenuation within this range.

Attenuation: SNR=26dB, H=30dB, M=23dB, L=15dB

PELTOR X2 HEADBAND

The X-Series earmuffs are 3M's latest advancement in hearing conservation. New technologies in comfort, design and protection all come together in this groundbreaking earmuff line. The X2A is a lightweight, lower-profile earmuff designed for protection against low-to-moderate level industrial noise and other loud sounds. It features an electrically insulated wire headband, often referred to as "dielectric".

- The wire headband offers consistent pressure over prolonged wearing periods.
- Earcup pivot points tilt for optimum comfort and efficiency.
- Noise Reduction Rating (NRR) 24 dB. CSA Class A.

NOTE: The X-Series (over-the-head) headband version is electrically insulated - sometimes referred to as "dielectric". The metal components of the headband have been covered by non-conductive material for use in a low voltage electrical hazard (less than 440 V ac). PELTOR X3 HEADBAND

The X-Series earmuffs are 3M's latest advancement in hearing conservation. New technologies in comfort, design and protection all come together in this groundbreaking earmuff line. The X3A features a newly designed spacer to help improve attenuation without the need for a much larger cup or double cup design. This lightweight earmuff is designed for protection against high-level industrial noise and other loud sounds. It features an electrically insulated wire headband, often referred to as "dielectric"

- The wire headband offers consistent pressure over prolonged wearing periods.
- Earcup pivot points tilt for optimum comfort and efficiency.
- Noise Reduction Rating (NRR) 28 dB. CSA Class AL.

NOTE: The X-Series (over-the-head) headband version is electrically insulated - sometimes referred to as "dielectric". The metal components of the headband have been covered by non-conductive material for use in a low voltage electrical hazard (less than 440 V ac). As there are no applicable standards for testing ear muffs against electrical insulating properties, the product has been evaluated at an external laboratory against a modified test method based on EN397:1995. PELTOR X3P3 HELMET ATTACHMENT

The 3M Peltor X3 Ear Defenders are designed to offer protection against high noise levels. For example, forestry or heavy engineering.

The 3M Peltor X3 utilises a newly designed spacer to help improve attenuation without the need for a double cup design, thus increasing the space inside the cup for greater comfort and wearability.

- High attenuation from a single cup design
- Light-weight and slim compared with similarly attenuating products.
- Simple colour coding: red indicating high attenuation.

Attenuation: Helmet Attachment: SNR=32dB, H=34dB, M=30dB, L=24dB

PELTOR X4 HEADBAND

The X-Series earmuffs are 3M's latest advancement in hearing conservation. New technologies in comfort, design and protection all come together in this groundbreaking earmuff line. The X4A utilizes a newly designed spacer, specially formulated foam liners and innovative ear cushions to help improve attenuation. This lightweight, lower-profile earmuff helps with compatibility with other personal protective equipment and is designed for protection against moderate-to-high level industrial noise and other loud sounds. It features an electrically insulated wire headband, often referred to as "dielectric".

- The wire headband offers consistent pressure over prolonged wearing periods.
- Earcup pivot points tilt for optimum comfort and efficiency.
- Noise Reduction Rating (NRR) 27 dB. CSA Class AL.

NOTE: The X-Series (over-the-head) headband version is electrically insulated - sometimes referred to as "dielectric". The metal components of the headband have been covered by non-conductive material for use in a low voltage electrical hazard (less than 440 V ac). PELTOR X4 HELMET ATTACHMENT

The 3M Peltor X4 Ear Defenders are designed to offer protection against high noise levels, whilst maintaining a sleek, low profile, aesthetically pleasing design.

Historically, higher attenuating ear muffs meant large and bulky cups - but not anymore. The 3M Peltor X4 Ear Defenders can attenuate sound by as much as 32dB whilst maintaining a sleek, low profile, aesthetically pleasing design.

- Extremely slim and light-weight cups help to improve compatibility when used with other Personal Protective Equipment.
- New specially formulated damping pads and innovative foam contained in the sealing ring provide excellent acoustic protection, particularly against sounds dominated by low frequencies.
- Simple colour coding: bright green, indicating high attenuation combined with an extremely slim, lightweight design

Attenuation: Helmet Attachment: SNR=32dB, H=36dB, M=30dB, L=21dB

PELTOR X5 HEADBAND

The 3M Peltor X5 Ear Defenders are designed to offer protection against extremely high noise levels. For example airports, quarrying or paper mills.

- Unparalleled attenuation (SNR 37dB) as a result of an optimum combination of specially formulated foam technology and a newly designed spacer and cup.
- Despite the larger cups the product remains relatively lightweight with excellent balance and wearer comfort.
- Simple colour coding: black, for extremely high attenuation in demanding environments.

PELTOR X5P3 HELMET ATTACHMENT

The X-Series earmuffs are 3M's latest advancement in hearing conservation. New technologies in comfort, design and protection all come together in this groundbreaking earmuff line. The X5A earmuffs offer the highest NRR (31 dB) for an earmuff on the market which makes them ideal for very high noise situations. The high attenuation delivered by X5A earmuffs is possible as a result of a combination of advanced technologies including: newly designed spacers, specially formulated earcup liners and innovative foam contained in the cushions. It features an electrically insulated wire headband, often referred to as 'dielectric'.

- Replaceable ear cushions and foam liners (hygiene kit HYX5).
- Noise Reduction Rating (NRR) 31 dB. CSA Class AL.
